

#4 Choice: Ocean View Screen Door (Available at Screens & Things)

The Ocean View offers the most visibility and ventilation of all hinged screen door options!

The extra-heavy-duty frame measures 2-1/8" x 3/4", which is constructed of extruded aluminum and is stronger than roll-formed steel frames. The rigid LOK-tite™ corners ensure that the Aspen doesn't flex, and provides stability. Oilite bearing hinges are fastened to the expander channel with aircraft quality rivets. The heavy duty quiet pneumatic closure is guaranteed for 10 years. The pushbutton lock is the highest quality as well. Standard 18x16 charcoal fiberglass insect screening helps keep the bugs out, while letting the air in.

Sizes available:

- 30"x80", 32"x80", 36"x80", 36"x84"
- Special sizes up to 48"x96" max

Options:

- Standard colors: Clear anodized, bronze anodized, mill finish, bronze painted, white painted, Desert Sand painted, and Champagne Beige painted
- Special colors: Available upon request
- French door configurations, complete with astragal, anchor bolts and hardware

Various screen mesh types to fit your needs.

Note: The waterfall visual in the background illustrates the amount of visibility through this screen door. The screen itself Does NOT have a Waterfall Design!
If you can find the exact same screen somewhere else, you are welcome to purchase it wherever you want.
